

AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please enter the following Abstract of the Disclosure in the record:

A display device for household devices includes a housing for receiving a plurality of light-emitting elements. The housing is at least partially covered by a film-type, partially translucent means having a plurality of specific regions. The light-emitting elements are arranged in the housing such that, during light emission, each light-emitting element only radiates through one of the specific regions of the translucent means. A pushbutton is associated with each of the specified regions for activating a corresponding one of the light-emitting elements.
